

About Nippon Recruitment

Nippon Recruitment specialises in international recruitment worldwide, with a focus on Japanese companies. On behalf of our customer, a global center of expertise in AV's (automated vehicles), we are looking for a

Software Engineer (1039) AGV, home office, fluency in English with Japanese language skills

Company information

Our customer is a startup company within one of the biggest automotive corporations. They work from home, use corporate offices and facilities worldwide, being cloud-native and believing in digital twins, machine learning and CI/CD 7*24. Main focus will be to provide a seamless control system over all AV's, such as automated guided forklifts (AGFs), automated guided vehicles (AGVs), and autonomous mobile robots (AMRs). They meet physically twice per year to learn in high intensive workshops, are mainly based in Europe, USA/Canada and Japan, but are open for applications worldwide.

Job description

As a software engineer, you will be part of all processes related to creation design of new systems. This includes planning, designing, coding and testing systems for all AGV purposes in all application areas around the world.

Job requirements

In order to qualify for this versatile and challenging position, required are at least the following criteria:

- Expert in Agile/SAFe DevOps software development
- Extensive knowledge of Azure cloud platform. Proficient in Java and/or C#, preferably also Python
- Proven hands-on experience in full automated CI/CD pipelines and test-/emulation environments. Tooling Azure DevOps, or similar like source code management (GitHub), containerization (Dockers/Kubernetes) and monitoring (Nagios)
- 10y+ of experience in AGV-business in logistics business (especially manufacturing/warehousing)
- In dept knowledge of and experience in vehicle design, EM, safety and OT-on board software
- Extensive knowledge of competitors and potential partners
- Fluent in English, preferably with Japanese language skills
