

## **About Nippon Recruitment**

*Nippon Recruitment specialises in international recruitment worldwide, with a focus on Japanese companies. On behalf of our customer, a multinational producer of machinery located in Almere, we are looking for a*

## **Inventory Planner (Almere, 1069) Spare parts, supply chain, English**

### **Company information**

Our customer produces machinery and equipment which are being used for many applications in various industries.

### **Job description**

Our customer is looking to hire a Spare Parts Inventory Planner to join the Spare Parts team in the Almere HQ. The Planner plays a significant role in developing the spare parts business and helping the company grow by properly managing parts inventory and responding to customer parts demand and satisfaction.

- Create and plan a demand forecast for spare parts to achieve the required service level at the minimum inventory level
- Analyze and evaluate the shortage list to improve order fulfillment
- Plan periodical stock replenishment orders and place purchase orders
- Check daily backorder items from dealers and process purchase orders
- Maintain the parts master on ERP system (SAP)
- Prepare spare parts for the new product launch in right timing
- Manage and dispose obsoleted parts, scrapping and parts return
- Work closely with suppliers to solve fluctuations in inventory management
- Work closely with the Parts dealer support team and dealers to meet market demands and trends to ensure customer satisfaction
- Prepare parts stock for machine warranty/or quality issues
- Assist in maintaining KPIs and provide reports and requested information
- Develop a Parts inventory control strategy to help warehouse staff to improve their service capabilities
- Coordinate with Dealers to monitor their inventory level
- Make parts recommendation lists for new dealers, also for newly launched models
- Propose and execution for the improvement of daily operations

## **Job requirements**

In order to qualify for this versatile and challenging position, required are at least the following criteria:

- At least bachelor degree (Data Science / Mechanical Engineering or equivalent)
- Proven track record of at least 5+ years of work experience in Construction or agricultural machinery or automotive (or similar industrial machinery) parts inventory planning, control/management and procurement
- Strong analytical, planning and problem-solving skills
- Strong understanding of MRP, supply chain software and/or SAP
- Good understanding of mechanical products and familiar to read parts books
- Good understanding of existing BOM structure as well as the physical products
- Good understanding of Incoterms and full process of logistics
- Excellent customer service and communication skills
- Ability to communicate internally and externally with people from various cultural backgrounds
- Fluency in English, any other language skills are welcome

Are you looking for this broad and challenging role? Please send your CV to Gert-Jan van der Lei ([application@nipponrecruitment.com](mailto:application@nipponrecruitment.com)) or call + 31 6 21257183.
