### **Software R&D Engineer,Ghent (Belgium) Fluency in English and Japanese**

#### **Company information**

Our customer is a leading specialist in manufacturing CAM and Pre-CAM software, photo plotters and direct imaging systems for the global Printed Circuit Board (PCB) industry. In over 25 years' continuous experience in the development, supply and support of leading-edge front-end tooling solutions, their uncompromising pursuit of engineering excellence has always been key to their success.

#### **Job description**

As a Software R&D Engineer, you will be responsible for

- Support growing software development needs in Ghent and Prague
- Write, maintain, and document CAM programs for the PCB industry
- Communication with Japanese HQ and/or supplier of the Direct Imaging Machines
- Reporting to the Software R&D Manager

Training such as introduction to our customers' software programs will be provided.

#### **Job requirements:**

- Bachelor/Master degree in computer sciences (or similar)
- Fluent knowledge of English and Japanese
- Proven experience in programming
- Technical skills
- Aptitude for Java development
- Good algorithmic skills
- Knowledge of the Windows environment
- Motivated, independent and enterprising
- Capable of writing technical project specifications based on client discussions
