## **Software Integration Engineer, Almere (1037) SAP, Azure, fluent in English**

### **Company information**

Our customer produces machinery and equipment which are being used for many applications in various industries. They are located in Almere, with the global HQ in Japan.

### **Job description**

The desired Software Integration Engineer has a strategic mindset, with a strong IT engineering background to enable growth of our customers' business. You will report to the Unit Manager IT.

- Development and integration of existing systems, to provide faster and more accurate dealer services in a rapidly expanding business environment.
- Analysing business processes
- Designing and building data-driven software solutions in a mainly MS and SAP environment

### **Job requirements**

In order to qualify for this position, required are at least the following criteria:

- At least 4 years' experience in a similar role
- Specific knowledge and experience in an Azure Database environment as well as UiPath RPA, Power BI and generic cloud databases
- Knowledge and experience in one or more relevant language stacks: DAX, Python or similar
- Build-Test-Deploy automation on collaboration with the Japanese mother company, with a strong focus on compliance and documentation
- Experience in a project environment, being self-starting and self-organizing and taking ownership
- Valid work permit

### **Full-time / Part-time**

Available for at least 32 business hours per week and at least 3 days working at the Almere-office

Are you looking for this broad role? Please send your CV to Gert Jan van der Lei (application@nipponrecruitment.com) or call +31 6 2125 7183.
